## PM-02 TABLE LAMP ELEGANT ILLUMINATION

Casting a warm, ambient glow, Fritz Hansen's newest addition to the Planner™ family is a simple and small lamp that makes a big impact.

## ELEGANT ILLUMINATION

A new addition to our Planner™ series of relaunched designs from the 1950s by the late American designer Paul McCobb, Fritz Hansen's PM-02 table lamp channels a minimalist expression with a decidedly Scandinavian feel.

Proving that simple can be beautiful, the thoughtful, practical design emits diffused light from its hand-blown opal glass shade to create a warm, atmospheric glow. The three-legged base in solid untreated brass or black lacquered steel provides an elegant contrast to the cylindrical shade.

Ideal for rooms where space is at a premium – or to update a room without the splurge – the PM-02 table lamp may be small, but it makes a big impression: the subdued silhouette beautifully illuminates any setting, from desk corners and bedside tables to hallways and counter tops.

### DESIGN

Paul McCobb, 1950

PAUL McCobb (1917-1969)

Paul McCobb's innate understanding of perspective paved the way for a career as one of the most important design figures of his time. The self-taught designer's pragmatic yet perfectionist nature was reflected in his work, characterised by slender, graphic lines, a simplicity of form and lightness of design. His trademark scale and perspective imbued his no-nonsense designs, which focused on simplicity and functionality, pared-back to their purest forms.

## MATERIALS

The lamp's tube-shaped opal glass shade is hand-blown by skilled craftspeople and set on one of two base types: Untreated solid brass, which tarnishes as it ages, and black lacquered steel.
